

Camper security information

During the crossing, it is strictly forbidden to stay in your mobile home, caravan or any other vehicle on the car deck. Therefore, the car decks remain locked during the entire crossing.

Smoking and open fire are also strictly forbidden on the car deck, even in a mobile home, caravan or any other vehicle. Therefore, you must close the main valve of gas bottles for cookers and refrigerators prior to the crossing. The compartment, where the gas bottles are stored, may not be locked and must be accessible.

Please put this information leaflet behind your windscreen, visible from outside. Please observe these safety instructions – for your own safety and that of your fellow passengers.

We wish you a pleasant voyage with TT-Line.
